

Accuracy Recap Section — Implementation Brief

Overview

Complete redesign of the area between the tournament hero card and the player leaderboard in the completed/results state. Replace the current centered ring, bordered breakdown box, and best call card with a compact, horizontal, animation-driven layout.

Reference prototype: The React artifact "accuracy-recap-redesign.jsx" shows the exact target design. Match it precisely.

Section 1: Score + Stats (Horizontal Layout)

Current: Centered ring (120px) → subtitle → bordered 3-cell breakdown box (vertical stack)

New: Ring left (84px) + text and stat pills right (horizontal layout)

Container:

- display: flex, align-items: flex-start, gap: 20px
- padding: 24px 0 20px
- No background, no border, no card
- Entry animation: opacity 0→1, translateY 12→0, duration 0.6s, cubic-bezier(0.16, 1, 0.3, 1), delay 0.2s

Left — Score Ring:

- SVG, 84px x 84px viewBox
- Track circle: r=36, stroke #E7E5E4, strokeWidth 5, no fill
- Progress circle: r=36, stroke #16A34A, strokeWidth 5, strokeLinecap round
- strokeDasharray: 226 (circumference of r=36)
- Animation: strokeDashoffset from 226 to (226 - (pct/100) * 226), duration 1.2s, cubic-bezier(0.34, 1.56, 0.64, 1), delay 0.4s — this gives it a slight overshoot/bounce feel

- Rotation: transform rotate(-90deg), transformOrigin center
- Center text: "{hit}/{total}" where hit is the count-up number
 - Hit number: 28px, font-weight 800, text-foreground, letter-spacing -0.03em
 - "/" separator: font-weight 300, text-muted-foreground
 - Total number: 28px, font-weight 800, text-foreground
- **Count-up animation:** The hit number counts from 0 to actual value (e.g., 0→1→2→3) with 180ms intervals, starting when the section becomes visible

Right — Context + Stat Pills:

- paddingTop: 6px (aligns text baseline roughly with ring center)
- Subtitle: "picks finished in the **Top 10**" — 14px, text-muted-foreground, "Top 10" in font-weight 700 text-foreground
- margin-bottom: 14px below subtitle

Stat Pills Row:

- display: flex, gap: 6px
- Each pill: flex row, align-items center, gap 5px, padding 5px 10px, border-radius 8px
- Active pill (value > 0): background rgba(22, 163, 74, 0.06), border 1px solid rgba(22, 163, 74, 0.12)
- Inactive pill (value = 0): background #F5F5F4, border 1px solid #E7E5E4
- Number: 15px, font-weight 800, letter-spacing -0.02em — green (#16A34A) when active, #A8A29E when inactive
- Label: 10px, font-weight 600, letter-spacing 0.04em, uppercase — same color logic as number, opacity 0.8
- Labels: "Top 5", "Top 10", "Top 20"
- Staggered entry: each pill animates in with opacity 0→1, translateY 8→0, delay 0.5s + (index * 0.08s)

Section 2: Best Call Achievement Banner

Current: Text callout with gold left border in a muted card

New: Achievement-style banner with gradient icon and glow

Container:

- display: flex, align-items center, gap 10px
- padding: 11px 14px, border-radius: 12px
- background: linear-gradient(135deg, rgba(22, 163, 74, 0.04) 0%, rgba(202, 138, 4, 0.04) 100%)
- border: 1px solid rgba(22, 163, 74, 0.08)
- margin-bottom: 8px
- Entry animation: opacity 0→1, translateY 8→0, delay 0.7s

Left — Glow Icon:

- 28px x 28px, border-radius 8px
- background: linear-gradient(135deg, #16A34A, #CA8A04) — green to gold gradient
- Center: "+" character, 13px, white
- Animation: pulsing glow — box-shadow 0 0 0 0 rgba(22,163,74,0.15) → 0 0 0 8px rgba(22,163,74,0) → back, 3s infinite

Right — Text:

- Line 1: "**Best call**" (13px, font-weight 700, text-foreground) + " — {playerName} " (13px, text-muted-foreground) + "Pick #{n}" (11px, #A8A29E, font-weight 500)
 - Line 2: "Finished {position}" — 12px, font-weight 600, #16A34A (green), margin-top 1px
-

Section 3: Gradient Separator

Current: No separator (or basic border)

New: Gradient fade line

- height: 1px
- background: linear-gradient(90deg, transparent, #E7E5E4 20%, #E7E5E4 80%, transparent)
- margin: 16px 0

- This creates a line that fades in from both edges — subtler than a full-width border
-

Section 4: Leaderboard Header

Keep existing "OUR PICKS · BEST FINISHERS FIRST" header. No changes except:

- Ensure entry animation: opacity 0→1, delay 0.9s
-

Section 5: Player Rows

Keep existing player row layout (position, avatar, name/flag, score). Add staggered entry animation:

- Each row: opacity 0→1, translateY 8→0
 - Delay: 1.0s + (index * 0.06s)
 - Duration: 0.4s, cubic-bezier(0.16, 1, 0.3, 1)
-

Winner Variant

When one of our picks wins (finishes 1st), enhance the Best Call banner:

- Replace the gradient icon background with a solid gold: linear-gradient(135deg, #CA8A04, #EAB308)
 - Add "🏆" emoji inside the icon square instead of "♦"
 - Line 2 becomes: "Won the tournament" in green, font-weight 700
 - Optional: slightly larger banner padding (13px 16px) for emphasis
-

Animation Keyframes Required

```
@keyframes pulseGlow {
  0%, 100% { box-shadow: 0 0 0 0 rgba(22, 163, 74, 0.15); }
  50% { box-shadow: 0 0 8px rgba(22, 163, 74, 0); }
}
```

The rest of the animations use CSS transitions (not keyframes) with varying delays for the stagger effect.

Files to Modify

File	Change
<code>ResultsRecap.tsx</code>	Complete rewrite. Remove AccuracyRing component, remove bordered breakdown row, remove old best call card. Replace with the horizontal score + pills layout, achievement banner, and gradient separator as specified above.
<code>AccuracyRing.tsx</code>	Can be deleted — the ring is now inline SVG within ResultsRecap (simpler, fewer components).
<code>TournamentInsights.tsx</code>	Add staggered animation delays to the player row rendering. Ensure the separator and header sit between ResultsRecap and PredictionLeaderboard correctly.

What NOT to Change

- PredictionLeaderboard.tsx — player rows stay as-is (position left, avatar, name/flag, score right)
 - ActualPositionBadge.tsx — keep current fixed-width 48px container
 - Data hooks — no data changes needed
 - Any other section outside the completed results state
-

Testing

- Score ring is 84px, positioned left, with count-up animation (0→1→2→3)
- Ring fill animates with slight bounce/overshoot easing
- Stat pills sit right of the ring, horizontal row, compact
- Active pills have green tint, inactive pills have neutral background
- Best call banner has gradient green→gold icon with pulse glow

- “Finished 2nd” shows in green text below the best call text
- Gradient separator fades from transparent edges
- All elements stagger in on load with cascading delays
- Winner variant shows gold icon with trophy when a pick finishes 1st
- No bordered cards, boxes, or containers visible anywhere in the section
- Total vertical space from hero bottom to first player row is significantly reduced
- Section feels animated, alive, and premium — not static and flat
